### **PROFESSIONAL SUMMARY**

Highly motivated and results-oriented economics researcher with over four years of experience in applied economic analysis, data-driven research, and academic teaching. My work focuses on energy economics, climate change, green finance, and stock market performance, particularly within developing and emerging markets like ECOWAS, COMESA, and Sub-Saharan Africa. I bring experience in oil price volatility, renewable energy transition, and environmental sustainability, with a strong emphasis on macroeconomic changes.

Skilled in econometric modeling, data visualization, and quantitative analysis using tools such as Stata, E-Views, and SPSS, I apply advanced techniques, including MMQR, ARDL, and panel data analysis, to generate insights that inform policy, guide investment, and promote sustainable development.

With a proven ability to translate complex data into actionable research and clear teaching content, I am seeking a lecturing position at your prestigious university where I can continue to teach, research, and contribute to solving real-world economic challenges, especially those related to climate policy, energy markets, oil markets, and sustainable finance.
